- 6.2 Taarifa ya Mwenyekiti iliendelea kueleza kwamba katika kipindi cha mwaka ulioishia tarehe 30 Juni, 2023, utendaji wa Mfuko uliendelea kuwa mzuri. Faida kwa wawekezaji ilikuwa kubwa ikilinganishwa na kigezo linganifu (Performance Benchmark) ikiwa ni wastani wa faida ya asilimia kumi na nne (14.0%) ikilinganishwa na asilimia kumi na tatu (13.6%) ya mwaka ulioishia tarehe 30 June 2022. Faida iliyopatikana iko sawa na maendeleo ya soko na ni kubwa kuliko kigezo linganifu cha asilimia 7.6 katika kipindi cha mwaka wa fedha kilichoishia tarehe 30 June 2023. Katika kipindi cha mwaka wa fedha ulioishia Juni 2023, thamani ya mfuko iliongezeka kutoka shilingi bilioni 18.5 iliyofikiwa Tarehe 30 Juni 2022 hadi Shilingi bilioni 20.0 tarehe 30 Juni, 2023. Mwakilishi wa Mwenyekiti aliwaeleza wawekezaji kuwa, ongezeko hili la thamani ya Mfuko limetokana na faida nzuri inayopatikana,

matumizi ya teknolojia katika kufanya miamala ya uwekezaji, kuongezeka kwa Imani na elimu juu ya faida zinazopatikana kuitia Mifuko ya uwekezaji wa pamoja.

- 6.3 Taarifa ya Mwenyekiti iliwalijulisha wawekezaji kuwa wakati dunia inaendelea kupata ahueni juu ya athari za UVIKO 19 na madhara ya vita nchini Ukraine, hali ya uchumi kwa mujibu wa machapisho ya Ofisi ya Taifa ya Taktamu, imeendelea kuimarika na kukua kwa asilimia 4.7 kwa mwaka 2022 na kiwango cha asilimia 5.4 na asilimia 5.2 kwa robo ya kwanza na ya pili kwa mwaka 2023. Aidha, ukuaji wa uchumi wa Tanzania umekuwa zaidi ya ukuaji katika nchi za ukanda wa Jangwa la Sahara na nchi za ukanda wa Ushirikiano wa Maendeleo Kusini mwa Afrika (SADC amba ni asilimia 3.5. Hata hivyo, kwa mujibu wa taarifa za Benki Kuu ya Tanzania, ya kipindi cha robo mwaka kilichoishia Tarehe 30 Juni, 2023, mfumko wa bei ulikuwa ni asilimia 4.0, ikilinganishwa na wastani wa asilimia 12.6 kwa nchi za Afrika Mashariki na asilimia 17.1 kwa nchi za ukanda wa SADC. Kwa kipindi cha mwaka mmoja uliopita. Viwango vyta riba katika soko havikubadilika sana, ikiashiria uimara wa soko kwa ujumla. Kwa upande mwingine, thamani ya shilingi ya Tanzania dhidi ya dola ya Marekani ilipungua kidogo kwa kiwango cha asilimia 1.0 na kuongezeka thamani dhidi ya fedha za baadhi ya nchi za Afrika Mashariki kwa viwango vyta hadi asilimia 15.0.
- 6.4 Kuhusu maendeleo ya Soko la Mitaji na Dhamana ambalo utendaji wake hupimwa kwa kuangalia mabadiliko ya Fahirisi (Tanzania Share Index), imenesha kuwa na maendeleo mazuri. Katika kipindi cha mwaka kilichoishia tarehe 30 Juni, 2023, kumekuwa na ongezeko la asilimia 4.1 ambapo iliongezeka toka 3,928.5 tarehe 30 Juni 2022 hadi 4,091.8 tarehe 30 Juni 2023. Ongezeko hilo ni chini ya lile la tarehe 30 Juni, 2022 ambalo lilikuwa ni asilimia 7.5. Hii inamaanisha kuwa, kwa kipindi cha mwaka ulioishia tarehe 30 Juni, 2023, bei za Hisa kwa ujumla ziliongezeka japo kwa kiwango kidogo ikilinganiswa na mwaka uliopita. Sababu za kupanda kwa bei za Hisa kulichagizwa na utendaji mzuri wa Makampuni yaliyoordheshwa katika Soko la Hisa la Dar es Salaam, kuongezeka imani kwa wawekezaji wa ndani na wa nje ya nchi na kuboreshwa kwa mazingira ya uwekezaji hapa nchini. ## Chairman's Statement

## CHAIRMAN'S STATEMENT

**Dear Investors,**

On behalf of the Board of Directors, I am pleased to welcome you all to the 12<sup>th</sup> Annual General Meeting (AGM) of Jikimu Fund. We thank you for making time to attend the AGM that will discuss developments of the Scheme for the financial year ended 30 June 2024, get replies to any queries you might have and listen to very interesting speakers who will raise our level of understanding of the ever-changing landscape of financial investment.

As new Chairman of the UTT AMIS Board of Directors, please allow me to record my profound appreciation to Her Excellency, Samia Suluhu Hassan, the President of the United Republic of Tanzania, for appointing me to lead the Board of Directors of UTT AMIS. My appreciation also goes to Honourable Dr Mwigulu Lameck Nchemba (MP), the Minister of Finance, the Permanent Secretary Treasury, Dr. Natu Mwamba and the Treasury Registrar, Mr. Nehemiah Mcchebu, for the guidance I received following my appointment to the Chairmanship. I also thank you investors into Jikimu Fund for your confidence in the Fund. As I take over from the previous Chairman, Mr. Casmir Sumba Kyuki, please allow me to record my appreciation for his outstanding leadership of the UTT AMIS Board of Directors. My brother, Kyuki, has steered UTT AMIS from a small organisation to one of the leading organisations in the capital market in Tanzania and the region at large. I, again, thank him for an outstanding tenure and wish him good health and the very best in his future endeavours.

Dear Investors, as we all know, UTT AMIS is a unique wealth creation public institution which was formed by our responsive Government way back in 2003 with several aims including development of collective investment schemes and encouraging saving and investment culture through wide participation in the ownership of distributed shares / units, among others. Indeed, over 20 years of the existing in different formats, a lot of wealth has been created and distributed for investors. It is a pleasure to communicate with my fellow investors who have tasted the joy which comes from the passive investment which enables us to make money while we are sleeping or taking care of other life activities. One wise seasoned successful investor, Warren Buffet – CEO of Berkshire Hathaway in the USA, once quipped that “if you don’t find a way to make money while you sleep, you will work until you die”. I sincerely therefore applaud each investor for the wise decision you took to trust and invest your money in various UTT AMIS funds. As this report will clearly demonstrate, our UTT AMIS is well run by very competent management and staff who are supervised judiciously by various public institutions. Given this level of commitment and supervision, it came by no surprise that UTT AMIS emerged as an overall winner of the most efficiently run public institution in the Country. On behalf of you all, I was privileged to receive a trophy from HE the President, Dr. Samia Suluhu Hassan, in Arusha during the Chairmen and CEOs Forum on 28 August 2024.

Ladies and Gentlemen, it is my belief that you have been following developments of the Fund and that you have received and reviewed the Report of the Scheme for the year ended 30 June, 2024. I am happy to report that the performance of the Fund for the year under review was very good. Returns to investors have exceeded their performance benchmark with annualised return of 13.7% compared to 13.6% recorded in the previous financial year. The rate of return achieved is in line with market development and higher than the benchmark return of 11.2%. During the year under review, the Fund increased in size from Shillings 20.0 billion on 30 June 2023 to Shillings 26.8 billion on 30 June 2024. The increase is mostly attributed to good returns, automation of investment processes and growing public confidence and awareness on the benefits of investing through collective investment schemes.

### Performance of the Economy and Market Environment

Ladies and Gentlemen, despite risks emanating from geopolitical tensions and wars around the World, performance of the Tanzanian economy has continued to improve as it grew by 5.1% in 2023 and is projected to grow by 5.4% in 2024. This compares favourably with average growth of 3.4% in 2023 and 3.8% in 2024 of the Sub-Saharan African countries as projected by the International Monetary Fund. As per the Bank of Tanzania reports, inflation was 3.1% in June 2024 against the target of not more than 5% and the East African countries target of not more than 8%. Over the last one year, market interest rates have remained around same levels indicating overall stability of the market. As for the foreign exchange market, the Tanzanian Shilling depreciated by approximately 12.86% against the US Dollar mostly due to changing policies in the United States of America and effects of geopolitical tensions and the ongoing wars in Asia.

Regarding capital market development, quite good progress was noted during the year under review. A number of new listings of debt securities were made while prices of listed shares improved as reflected through the increase of the Tanzania Share Index (TSI). During the year, TSI increase by 9.37% from 4,091.81 on 30 June 2023 to 4,475.20 on 30 June 2024. This compares favorably with the previous financial year where the increase of the TSI was 4.16%. This indicates that performance of listed companies was better during the financial year under review and that business environment has continued to improve. We thank the President, Her Excellence Samia Suluhu Hassan and the Government for maintaining conducive business and regulatory environment in the Country.

## **Managed Funds Performance and other Developments**

Ladies and Gentlemen, as regards performance for the financial year ended on 30 June 2024, performance indicators show that UTT AMIS and the funds under management performed very well. Funds under management increased from Shillings 1.5354 Trillion on 30 June 2023 to Shillings 2.2382 Trillion on 30 June 2024. This indicates an increase of Shillings 702.8 billion which is 45.7% compared to increase of Shillings 538.9 billion or 54.0% in the previous financial year. Growth in fund size is also supported by the increase in the number of investors in the schemes that went up by 79,519 or 32% compared to 47,480 or 24% in the previous financial year. For the year under review, returns to investors in all the funds under management were very good – as pointed out earlier, Jikimu Fund had a return of 13.7%.

Ladies and Gentlemen, during the year under review, the Company continued with the final phase of implementation of the five years Strategic Plan to June 2024. The Company also worked on a new Strategic Plan for the next five years. The New Plan is intended to make UTT AMIS one of key players in the capital market in Tanzania and the East African region. To align with Government planning cycle, the Plan will be reviewed in the 2024/2025 financial year so that it ends in June 2030. From the Plan, some of the strategic goals include growing fund size from Shillings 2.2 trillion currently to Shillings 7.5 trillion, and increasing the number of service centres to bring services closer to investors in Tanzania, the East African and Southern African Development communities. Moreover, the Plan indicates that service delivery will mostly be technology driven with minimum or no paperwork. To prepare for implementation of the new Strategic Plan, during the financial year, the Company started working on upgrading of systems so as to enhance computing capability and accommodate higher volume of business. The upgrade project is planned for completion in the twelve months.

## **Prospects for the Financial Year 2024/25**

Ladies and gentlemen, the five years of implementation of UTT AMIS Strategic Plan to 2024 have been extremely successful and beyond what was initially projected. For instance, fund size was projected to grow from Shillings 290.74 billion on 30 June 2019 to Shillings 485.90 billion but later revised Shillings 1,007.90 billion on 30 June 2024, however, actual fund size on that date was Shillings 2.2 trillion. This indicates that actual performance was more than four times the initial projections and more than double the revised projections.

As we get into the first year of the new Plan, the Company intends to complete upgrade of systems to lay the groundwork for the next phase of growth of UTT AMIS business. Moreover, the Company will continue working on priorities including improving existing products and services and identifying new business lines for the benefit of investors, shareholders and other stakeholders. UTT AMIS will also continue working on modernization of operations and ensuring that investors obtain the best returns that the market may provide. It is our intention to make UTT AMIS one of important vehicles for not only wealth creation and management but also generational wealth.

During the Chairmen and CEOs Forum in Arusha, HE President of the United Republic of Tanzania, Dr. Samia Suluhu Hassan, instructed the parastatals which have the capability to venture to go out of Tanzania to look for more economic and profitable opportunities. As UTT AMIS embarks on implementation of the Strategic Plan for the next five years, we intend to reach more investors in Tanzania, East Africa and SADC countries. In fact, the Company has been following market developments in the two regional economic communities for a number of years now. Preliminary indications are that some of these countries have very interesting opportunities. We will enhance our efforts in analysing the new markets so that entry decisions could be made timely. Given the strategic plan goal of expanding the fund size, it is imperative that every opportunity must be seized. Because you already know the benefits of investing your hard-earned cash with UTT AMIS, we request you to be effective ambassadors of passing a word of mouth to your family members, friends and colleagues. In order to empower you for this task, we have a question and answers session as well as presentations, discussions and talks from seasoned experts in this field. Luckily, all the interesting speakers who have accepted to share their expertise are seasoned fellow investors in various UTT AMIS products.

## **Acknowledgements**

Ladies and Gentlemen, to conclude, I wish to thank you, esteemed investors for your unwavering support and confidence in UTT AMIS and Jikimu Fund during the year under review. My special appreciation to the Government, represented by the Ministry of Finance, the Office of Treasury Registrar, the Capital Markets and Securities Authority, the Custodian of the funds under management – CRDB Bank, the Dar es Salaam Stock Exchange including Brokers, UTT AMIS members of staff and all stakeholders who supported the Company during the year. It is my hope that you will all continue to extend your support to UTT AMIS for the good of our investors and development of the capital market and the financial services industry in Tanzania.

As a Board of Directors, we collectively look forward to your cooperation over the coming years.

Apart from the rate of return shown above, the other major differences that one needs to consider while comparing the Jikimu Fund with savings deposit rate in the markets are;

- Jikimu Fund returns are net of tax.
- Jikimu Fund is an open-ended fund providing liquidity throughout the year. So, one does not need to time the investments.
- Other instruments have a fixed tenure and if there is an emergency, it entails discounting of these instruments likely at lower value.
- Investing in Jikimu Fund is almost like having the ease of a savings deposit account coupled with the power of return over and above saving account.
- Jikimu fund provides income distribution to eligible investors. (a) Quarterly Income Distribution Plan [TZS 2 million] (b) Annual Income Distribution Plan [TZS 1 million].
- Flexibility in subscription and withdrawals, so one can buy as well as sell units on any business day.

## 4.0 Economic Indicators

### 4.1 Gross Domestic Product (GDP)

Measured through GDP, the economy grew by 5.1% in 2023 compared with 4.7% in 2022, driven by agriculture, construction, mining and other sectors. For the year 2024, the economy is projected to grow by 5.4% indicating that the Country has built resilience against disruptions caused by ongoing wars, geopolitical tensions and changing policies in international financial markets. Favourable business conditions and public investment in infrastructure contributed to the growth of the economy. The growth outlook is important for UTT AMIS-managed schemes and the entire economy since it provides indications on future prospects as regards performance of the funds.

**Table III: Year-on-Year Real Gross Domestic Product (GDP) Growth Rate**

(GDP)	7.0%	7.0%	4.8%	4.9%	4.7%	5.1%	5.4%*

### 4.2 Inflation Rate

The table below (Table IV), shows that the inflation rate has remained below 5.0%. According to the Monetary Policy Statement issued in July 2024, the rate has been within the EAC and SADC convergence criteria of 5.0% as the rate in June 2024 and June 2023 was 3.1% and 3.6% respectively. The observed trends of the inflation rate were mostly a result of adequacy of food supply, complemented by prudent monetary and fiscal policies implemented during the period.

Over the medium-term period of 3 to 5 years, inflation is projected to evolve within the target of 5.0%. Hence, having low and stable inflation in the economy is favorable to investors, UTT AMIS, and the economy at large, as it helps in preserving value of invested funds and enables investors keep extra cash for investing.

### 4.3 Banking Sector

During the financial year that ended in June 2024, the banking sector, which constitutes the largest segment of the financial services sector, remained sound, stable, and profitable, with adequate capital and liquidity. Total assets increased by TZS 8.3 trillion to TZS 62.0 trillion in June 2024 from TZS 53.7 trillion in the previous year, mainly driven by growth of deposits. Total customer deposits size rose by 13.7% moving from TZS 35.7 trillion to TZS 40.6 trillion while total loans and bills reached TZS 37.4 trillion compared with TZS 31.5 trillion in the previous year.

On digital banking channels, the reliability of payment systems remained stable, evidenced by a high rate of completed transactions and low downtime, encouraging public usage of the platform in financial services delivery. Moreover, in 2023 the volume and value of Wallet to Bank (W2B) transactions were 6.6 million and TZS 2.7 trillion respectively, reflecting an increase of 34.1% and 25.2% from the prior year.

The stability of the banking sector is important to the schemes and investors as it facilitates economic activities and smoothens subscriptions into the funds. UTT AMIS has successfully integrated systems with a number of commercial banks to enable investors buy units digitally at their convenience.

#### **4.4 Telecommunication Sector**

In the telecom market, subscriptions have increased by 11.5 million to 75.5 million in June 2024 compared with an increase of 7.8 million noted in a similar period of the previous year. Either, the subscriptions volume represents the count of all registered active sim cards used at least once in the past three months. Mobile money subscriptions (active sim cards with mobile money service accounts) have also increased by 18.0% moving from 47.2 million to 55.7 million in June 2024.

The volume of subscriptions for the sale of units received by UTT AMIS through the mobile phones was 47.4 billion in 2024 compared with 25.4 billion received in 2023.

For UTT AMIS, the growth of the Telecom sector has positive impact on service delivery as it has enhanced self-service, improved convenience and reduced paper work. Through mobile devices, investors can easily open accounts, buy or/and sell units, and view investment balances or activities by dialing \*150\*82# or using the UTTAMIS App. In addition, UTT AMIS is considering to increase the withdrawal amount through the mobile platform from the current value of TZS 2.0 million to 5.0 million per day.

#### **4.5 Government Securities**

During the financial year that ended in June 2024, the demand for treasury securities in the primary market was higher compared to the volume registered in the previous year.

In the Treasury bills market, the amount offered went down by TZS 0.6 trillion to TZS 2.7 trillion. However, on the demand side, the volume tendered went up by TZS 0.7 trillion to TZS 4.3 trillion from TZS 3.6 trillion in the prior year. Total successful bids increased by TZS 0.1 trillion from TZS 2.5 trillion to TZS 2.6 in 2024.

In the Treasury bonds market, a total of TZS 3.3 trillion were offered for sale compared with TZS 4.3 trillion in the previous year. Bids received for the period rose by TZS 0.6 trillion to TZS 5.2 trillion compared with TZS 4.6 trillion in the preceding year. Successful bids during the period decreased by TZS 1.1 trillion to TZS 2.8 trillion from TZS 3.9 trillion in 2023.

Increase in demand for treasury securities signifies an increase in public awareness on investments and savings. Hence, the increase in awareness and participation in the domestic market helps the schemes under management to enhance liquidity and deliver attractive returns to investors.

#### **4.6 Interest Rates**

Interest rates charged on loans and those offered on deposits by banks remained broadly unchanged from last year's pricing. The overall lending rate averaged 15.4% and that of one-year loans at 15.8%. The overall and one-year time deposit interest rates were 7.5% and 8.7%, respectively.

The Treasury Bills Overall Weighted Average Rate (WAR) went up to 8.3% in June 2024 from 6.5% in June 2023. The overall interbank cash market rate (overnight) rose to 7.2% from 5.0%. In January 2024, the Bank of Tanzania shifted from targeting quantity of money (monetary aggregates) to targeting interest rates. During the period, the Bank increased the Central Bank Rate (CBR) from 5.5% to 6.0%.

Yields in the domestic market specifically in the treasury bonds market traded at higher levels compared with rates in the preceding year. The upward movement of interest rates or yields have an upward effect on investors' returns and profitability.

#### **4.7 Foreign Exchange Market**

As of 30<sup>th</sup> June 2024, foreign reserves were more than USD 5.0 billion. The Bank projected that the reserves are sufficient to cover more than four (4) months of imports. The Shilling traded at TZS 2,640.0 per US dollar compared with TZS 2,339.1 per US dollar in June 2023 indicating depreciation of 12.8% compared with 1.0% in the previous year (Table V). The Bank has taken measures including limiting transaction dollarization between residents who are invoicing, quoting, or making payments using foreign currency. These are expected to reduce the demand for foreign currency, increase foreign reserves and stabilize the domestic currency. .

#### **4.8 Capital Market Performance**

In the financial year under review, the capital markets remained sound and resilient, with domestic investors participating actively in equity, debt securities and Collective Investment Schemes (CIS).

The market has been active in terms of turnover, new entrances, and activities. During the period, two commercial banks and one utility organization issued corporate bonds worth TZS 482.4 billion. During the period, two Funds were launched targeting to invest in both the stock and debt market. Alpha Capital Ltd launched a Sharia-compliant Fund called Alpha Halal and Timiza Fund by Zan Securities Ltd.

In the secondary market, the cumulative transaction value of traded bonds grew by TZS 0.6 trillion to TZS 3.5 trillion from TZS 2.9 trillion in the preceding year. 3.2	<b>What is inflation and how does it affect the common man?</b>	<p>In simple economic terms – “<b>Inflation is a rise in the general level of prices of goods and services in an economy over a period of time</b>”. When the price level rises, as an effect each unit of a currency buys fewer goods and services.</p> <p>In an economy though there could be many factors which may contribute towards the high rates of inflation or hyperinflation, however one of the prime reasons among them is - the ‘excessive growth of money supply’. When in a country the money supply grows at a faster pace comparative to the rate of economic growth, it provides an easy fuel to the inflationary powers.</p> <p>Globally, the generally accepted indicators to measure inflation are Wholesale Price Index [WPI], Consumer Price Index [CPI], Personal Consumption Expenditure Price Index [PCEPI], and GDP Deflator etc. The Consumer Price Index [CPI] in a country measures prices of a selection of goods and services as purchased by a representing class of consumers.</p> <p>From a common man’s perspective, it is important to understand that the task of checking inflationary conditions in a country is normally vested with the Central Bank. Time and again such monitoring authorities take various measures as they deem fit &amp; proper to effectively manage the pace of inflation in an economy.</p> <p><b>Important Lesson:</b> In a rising inflation economy, keep investing at regular intervals even if the amount is small. By practicing a disciplined systematic investment approach, you can ease off the negative impact of rising inflation on your investments.</p>																																																																						
3.3	<b>What is ‘Magic of Compounding’?</b>	<p>Simply put, compounding refers to the re-investment of income at the same rate of return to constantly grow the principal amount, year after year. Cumulative fixed deposits are a prime example of compounding at work, wherein the total interest that you get paid for the period is more than the rate of interest multiplied by the period of the deposit.</p> <p>Would you care too much whether your rate of return is 10% or 12%? The fact is that if you did, it would make a big difference to your wealth creation as time progresses. The benefit from compounding arises primarily from the fact that income keeps growing the principal to generate higher absolute returns each year. Higher rates of return or longer investment periods increase the principal amount in geometric proportions.</p> <p><b>The Impact of ‘Power of Compounding’:</b></p> <p>Use the table below, to see the impact of ‘power of compounding’ on one-time investment of TZS 50,000/- and TZS 5,000,000/= with different rates of return and periods.</p> <p><b>Table I.</b></p> <table border="1"> <thead> <tr> <th>Interest Rate</th> <th colspan="2">12%</th> <th colspan="2">14%</th> </tr> <tr> <th>Principle/Time</th> <th>50,000/=</th> <th>5,000,000/=</th> <th>50,000/=</th> <th>5,000,000/=</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>56,000.00</td> <td>5,600,000.00</td> <td>57,000.00</td> <td>5,700,000.00</td> </tr> <tr> <td>3</td> <td>70,246.40</td> <td>7,024,640.00</td> <td>74,077.20</td> <td>7,407,720.00</td> </tr> <tr> <td>5</td> <td>88,117.08</td> <td>8,811,708.42</td> <td>96,270.73</td> <td>9,627,072.91</td> </tr> <tr> <td>10</td> <td>155,292.41</td> <td>15,529,241.04</td> <td>185,361.07</td> <td>18,536,106.57</td> </tr> <tr> <td>20</td> <td>482,314.65</td> <td>48,231,465.47</td> <td>687,174.49</td> <td>68,717,449.36</td> </tr> </tbody> </table> <p>The table II below also shows the benefit from investing TZS 50,000,000/= and TZS 100,000,000/=, to see the impact of ‘power of compounding’ on one-time investment with different rates of return and time periods.</p> <p><b>Table II.</b></p> <table border="1"> <thead> <tr> <th>Interest Rate</th> <th colspan="2">12%</th> <th colspan="2">14%</th> </tr> <tr> <th>Principle/Time</th> <th>50,000,000/=</th> <th>100,000,000/=</th> <th>50,000,000/=</th> <th>100,000,000/=</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>56,000,000.00</td> <td>112,000,000.00</td> <td>57,000,000.00</td> <td>114,000,000.00</td> </tr> <tr> <td>3</td> <td>70,246,400.00</td> <td>140,492,800.00</td> <td>74,077,200.00</td> <td>148,154,400.00</td> </tr> <tr> <td>5</td> <td>88,117,084.16</td> <td>176,234,168.32</td> <td>96,270,729.12</td> <td>192,541,458.24</td> </tr> <tr> <td>10</td> <td>155,292,410.42</td> <td>310,584,820.83</td> <td>185,361,065.71</td> <td>370,722,131.41</td> </tr> <tr> <td>20</td> <td>482,314,654.66</td> <td>964,629,309.33</td> <td>687,174,493.59</td> <td>1,374,348,987.19</td> </tr> </tbody> </table>	Interest Rate	12%		14%		Principle/Time	50,000/=	5,000,000/=	50,000/=	5,000,000/=	1	56,000.00	5,600,000.00	57,000.00	5,700,000.00	3	70,246.40	7,024,640.00	74,077.20	7,407,720.00	5	88,117.08	8,811,708.42	96,270.73	9,627,072.91	10	155,292.41	15,529,241.04	185,361.07	18,536,106.57	20	482,314.65	48,231,465.47	687,174.49	68,717,449.36	Interest Rate	12%		14%		Principle/Time	50,000,000/=	100,000,000/=	50,000,000/=	100,000,000/=	1	56,000,000.00	112,000,000.00	57,000,000.00	114,000,000.00	3	70,246,400.00	140,492,800.00	74,077,200.00	148,154,400.00	5	88,117,084.16	176,234,168.32	96,270,729.12	192,541,458.24	10	155,292,410.42	310,584,820.83	185,361,065.71	370,722,131.41	20	482,314,654.66	964,629,309.33	687,174,493.59	1,374,348,987.19

By now, you've probably figured out the obvious conclusion from the above table. It is literally 'a waste of time and money' to let your wealth lie in low-income yielding investments for prolonged periods of time. You also must realize that **TIME** and **RATE OF RETURN** are the sources of the magic of compounding!!

**Important Lessons:** (1) Look for an investment opportunity, which can offer you comparatively superior returns; and (2) remain invested for a long time to avail the benefit of 'Magic of Compounding'.
